

Cedar Technologies					
Statamic Tasks					
Sr. No.	Description	Routes	Controllers	Table Name	Status
Login Module					
1	Install Laravel Breeze	N/A	N/A	N/A	
2	Breeze provide facility to register	/login, /register	AuthController	users	
3	Create login page template	/login	N/A	N/A	
4	Create registration page template	/register	N/A	N/A	
5	Implement forgot password functionality	/forgot-password	PasswordController	N/A	
6	Configure user authentication middleware	N/A	N/A	N/A	
7	Implement user registration validation	N/A	N/A	N/A	
8	Add remember me functionality	N/A	N/A	N/A	
9	Customize authentication views	N/A	N/A	N/A	
10	Test user authentication functionality	N/A	N/A	N/A	
Collections Module					
1	Create Collections Model	N/A	CollectionController	collections	
2	Set up routes for collections	/collections	CollectionController	N/A	
3	Create index page template	/collections	CollectionController	N/A	
4	Create show page template	/collections/{collection}	CollectionController	N/A	
5	Create create page template	/collections/create	CollectionController	N/A	
6	Create store method in controller	POST /collections	CollectionController	N/A	
7	Create edit page template	/collections/{collection}/edit	CollectionController	N/A	
8	Create update method in controller	PUT /collections/{collection}	CollectionController	N/A	
9	Create delete method in controller	DELETE /collections/{collection}	CollectionController	N/A	
10	Add authentication middleware to routes	N/A	N/A	N/A	

11	Implement authorization checks	N/A	N/A	N/A	
12	Test collection CRUD operations	N/A	N/A	N/A	
Entries Module					
1	Create Entries Model	N/A	EntriesController	entries	
2	Set up routes for entries	/collections/{collection}/entries	EntriesController	N/A	
3	Create index page template	/collections/{collection}/entries	EntriesController	N/A	
4	Create show page template	/collections/{collection}/entries/{id}	EntriesController	N/A	
5	Create create page template	/collections/{collection}/entries/create	EntriesController	N/A	
6	Create store method in controller	POST /collections/{collection}/entries	EntriesController	N/A	
7	Create edit page template	/collections/{collection}/entries/{id}/edit	EntriesController	N/A	
8	Create update method in controller	PUT /collections/{collection}/entries/{id}	EntriesController	N/A	
9	Create delete method in controller	DELETE /collections/{collection}/entries/{id}	EntriesController	N/A	
10	Add authentication middleware to routes	N/A	N/A	N/A	
11	Implement authorization checks	N/A	N/A	N/A	
12	Test entry CRUD operations	N/A	N/A	N/A	
Taxonomies Module					
1	Create Taxonomies Model	N/A	TaxonomiesController	taxonomies	
2	Set up routes for taxonomies	/taxonomies	TaxonomiesController	N/A	
3	Create index page template	/taxonomies	TaxonomiesController	N/A	
4	Create create page template	/taxonomies/create	TaxonomiesController	N/A	
5	Create store method in controller	POST /taxonomies	TaxonomiesController	N/A	
6	Create edit page template	/taxonomies/{taxonomy}/edit	TaxonomiesController	N/A	
7	Create update method in controller	PUT /taxonomies/{taxonomy}	TaxonomiesController	N/A	
8	Create delete method in controller	DELETE /taxonomies/{taxonomy}	TaxonomiesController	N/A	
9	Add authentication middleware to routes	N/A	N/A	N/A	

10	Implement authorization checks	N/A	N/A	N/A	
11	Test entry CRUD operations	N/A	N/A	N/A	
Navigations Module					
1	Create Navigations Model	N/A	NavigationController	navigations	
2	Set up routes for navigations	/navigations	NavigationController	N/A	
3	Create index page template	/navigations	NavigationController	N/A	
4	Create show page template	/navigations/create	NavigationController	N/A	
5	Create create page template	POST /navigations	NavigationController	N/A	
6	Create store method in controller	/navigations/{navigation}/edit	NavigationController	N/A	
7	Create edit page template	PUT /navigations/{navigation}	NavigationController	N/A	
8	Create update method in controller	DELETE /navigations/{navigation}	NavigationController	N/A	
9	Create delete method in controller	N/A	NavigationController	N/A	
10	Add authentication middleware to routes	N/A	N/A	N/A	
11	Implement authorization checks	N/A	N/A	N/A	
12	Test entry CRUD operations	N/A	N/A	N/A	
Terms Module					
1	Create Terms Model	N/A	TermsController	taxonomies_terms	
2	Set up routes for terms	/taxonomies/{taxonomy}/terms	TermsController	N/A	
3	Create index page template	/taxonomies/{taxonomy}/terms	TermsController	N/A	
4	Create create page template	/taxonomies/{taxonomy}/terms/create	TermsController	N/A	
5	Create store method in controller	POST /taxonomies/{taxonomy}/terms	TermsController	N/A	
6	Create edit page template	/taxonomies/{taxonomy}/terms/{term}/edit	TermsController	N/A	
7	Create update method in controller	PUT /taxonomies/{taxonomy}/terms/{term}	TermsController	N/A	
8	Create delete method in controller	DELETE /taxonomies/{taxonomy}/terms/{term}	TermsController	N/A	
9	Add authentication middleware to routes	N/A	N/A	N/A	

10	Implement authorization checks	N/A	N/A	N/A	
11	Test entry CRUD operations	N/A	N/A	N/A	
Assets Module					
1	Create Assets Model	N/A	AssetsController	assets	
2	Set up routes for assets	/assets	AssetsController	N/A	
3	Create index page template	/assets	AssetsController	N/A	
4	Create upload form template	/assets/upload	AssetsController	N/A	
5	Handle asset upload	POST /assets	AssetsController	N/A	
6	Create edit page template	/assets/{asset}/edit	AssetsController	N/A	
7	Create update method in controller	PUT /assets/{asset}	AssetsController	N/A	
8	Create delete method in controller	DELETE /assets/{asset}	AssetsController	N/A	
9	Add authentication middleware to routes	N/A	N/A	N/A	
10	Implement authorization checks	N/A	N/A	N/A	
11	Test entry CRUD operations	N/A	N/A	N/A	
Globals Module					
1	Create Globals Model	N/A	GlobalsController	globals	
2	Set up routes for globals	/globals	GlobalsController	N/A	
3	Create index page template	/globals	GlobalsController	N/A	
4	Create create page template	/globals/create	GlobalsController	N/A	
5	Create store method in controller	POST /globals	GlobalsController	N/A	
6	Create edit page template	/globals/{global}/edit	GlobalsController	N/A	
7	Create update method in controller	PUT /globals/{global}	GlobalsController	N/A	
8	Create delete method in controller	DELETE /globals/{global}	GlobalsController	N/A	
9	Add authentication middleware to routes	N/A	N/A	N/A	
10	Implement authorization checks	N/A	N/A	N/A	

11	Test entry CRUD operations	N/A	N/A	N/A	
Fieldsets Module					
1	Create Fieldsets Model	N/A	FieldsetsController	fieldsets	
2	Set up routes for Fieldsets	/fieldsets	FieldsetsController	N/A	
3	Create index page template	/fieldsets	FieldsetsController	N/A	
4	Create create page template	/fieldsets/create	FieldsetsController	N/A	
5	Create store method in controller	POST /fieldsets	FieldsetsController	N/A	
6	Create edit page template	/fieldsets/{fieldset}/edit	FieldsetsController	N/A	
7	Create update method in controller	PUT /fieldsets/{fieldset}	FieldsetsController	N/A	
8	Create delete method in controller	DELETE /fieldsets/{fieldset}	FieldsetsController	N/A	
9	Add authentication middleware to routes	N/A	N/A	N/A	
10	Implement authorization checks	N/A	N/A	N/A	
11	Test entry CRUD operations	N/A	N/A	N/A	
Forms Module					
1	Create Forms Model	N/A	FormsController	forms	
2	Set up routes for forms	/forms	FormsController	N/A	
3	Create index page template	/forms	FormsController	N/A	
4	Create show page template	/forms/create	FormsController	N/A	
5	Create create page template	POST /forms	FormsController	N/A	
6	Create store method in controller	/forms/{form}	FormsController	N/A	
7	Create edit page template	/forms/{form}/edit	FormsController	N/A	
8	Create update method in controller	PUT /forms/{form}	FormsController	N/A	
9	Create delete method in controller	DELETE /forms/{form}	FormsController	N/A	
10	Add authentication middleware to routes	N/A	N/A	N/A	
11	Implement authorization checks	N/A	N/A	N/A	

12	Test entry CRUD operations	N/A	N/A	N/A	
Users Module					
1	Create Forms Model	N/A	UserController	users	
2	Set up routes for forms	/users	UserController	N/A	
3	Create index page template	/users	UserController	N/A	
4	Create show page template	/users/create	UserController	N/A	
5	Create create page template	POST /users	UserController	N/A	
6	Create store method in controller	/users/{user}	UserController	N/A	
7	Create edit page template	/users/{user}/edit	UserController	N/A	
8	Create update method in controller	PUT /users/{user}	UserController	N/A	
9	Create delete method in controller	DELETE /users/{user}	UserController	N/A	
10	Add authentication middleware to routes	N/A	N/A	N/A	
11	Implement authorization checks	N/A	N/A	N/A	
12	Test entry CRUD operations	N/A	N/A	N/A
